FrontPoint SECURITY

Security the Way You Want It

After your activation call, you'll receive your MyFrontPoint.com login and password via email. Log on at:

- **Web:** www.myfrontpoint.com
- **Smart Phone:** www.myfrontpoint.com/pda

You'll have access to **amazing** interactive features including:

- Alarm system status and history
- Text and email alerts
- Unique users codes
- Video (live and recorded clips)
- Light control (on, off, scheduled, event-triggered)
- Temperature (thermostat control)
- Door Locks

Note: online access, features, and apps require Interactive or Ultimate Monitoring. Some features only available for Ultimate Monitoring. It's easy to upgrade, contact customer support at (866) 252-7660.

Naming Sensors

To make sure your alerts and event history are displayed correctly, you'll want to update your sensor names.

Click on **Security**

Click on **Sensors**

Update your sensor names using the Sensor Location Sheet from your Quick Start Guide.

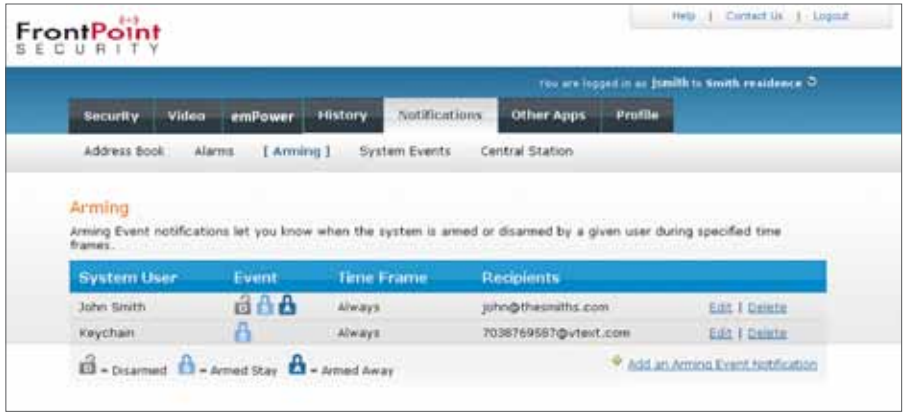
Text and Email Notifications

It's easy to set up text and email alerts for anyone, at anytime, for any event.

Click on **Notifications** and add recipients to your address book

Customize your notifications for:

- **Alarms:** when an alarm is triggered
- **Arming:** when your system is armed or disarmed (or when the system has not been disarmed by a certain time)
- **System Events:** such as low battery, power failure, malfunction, etc.
- **Sensor Activity:** activity for door/window sensors or motion sensors
- **Sensor Left Open:** when any door/window sensor is left open for a specified time frame



Video Monitoring

Keep a constant eye on your home though live video streaming or recorded video clips. You can:

- Watch live video through myfrontpoint.com or any web enabled phone
- Save and download video recordings
- Customize camera and clip descriptions
- Pan and tilt your camera remotely (requires a pan/tilt camera)
- Record video clips based on motion or if a particular event occurs (e.g. door opening, system arming, alarm events)

Home Automation (Z-Wave)

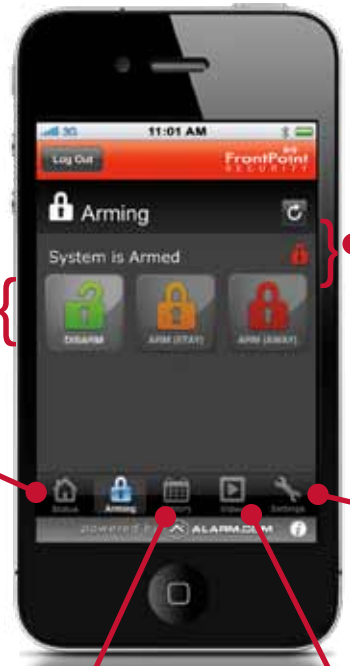
Remote control is easy with home automation features. You can:

- Remotely control lamps and small appliances
- Set up schedules for lights to turn on while you are away
- Have lights illuminate when a sensor is triggered
- Remotely adjust thermostat temperature
- Remotely unlock or lock doors

Apps

Monitor and control your alarm system from practically anywhere with FrontPoint's mobile apps (requires Interactive or Ultimate Monitoring).

iPhone App



Arming Buttons: Use these buttons to arm and disarm your system.

Status Snapshot: Quickly see the status of your system.

Status Tab: View the current status of your system.

Settings Tab: Activate and pause push notifications for alarms, and control home automation features.

History Tab: View recent sensor activity, alarms, notifications, etc. Also apply filters to view specific types of events.

Video Tab: View both live streaming video and saved video clips.

To download the iPhone App:

- Click on the "App Store" icon and search for "Alarm.com"
- After locating, tap "Free" and "Install" to begin downloading

BlackBerry App

Arming Buttons: Use these buttons to arm and disarm your system.

Video Tab: View both live streaming video and saved video clips.

Status Tab: View the current status of your system.

History Tab: View recent sensor activity, alarms, notifications, etc. Also apply filters to view specific types of events.

Home Automation Tab: Control various home automation features like lights, thermostats, etc.

To download the BlackBerry App:

- Using your BlackBerry's default browser, visit: www.alarm.com/bbinstall

Smart Phone Apps

Android App

Status Tab: View the current status of your system.

Arming Buttons: Use these buttons to arm and disarm your system.

Live Video Tab: View live streaming video and control the viewing angle of a pan and tilt camera.

History Tab: View recent sensor activity, alarms, notifications, etc. Also apply filters to view specific types of events.

Saved Video Tab: View saved video clips at any time, anywhere in the world.

Home Automation Tabs: Control various home automation features like lights, thermostats, etc.

To download the Android App:

- Click on the Android Market icon
- Within the Android Market, search for "Alarm.com"
- Download the Android App
