

# GETTING STARTED

## Carbon Monoxide Sensor

The Carbon Monoxide Sensor is always monitoring for harmful carbon monoxide gas even when your system is disarmed . Follow the instructions below to get protected in no time:

- 1 Select a location on a wall, at least 2 feet from a corner, in a sleeping area or common hallway shared by multiple bedrooms.
- 2 Make sure the surface is clean and dry.
- 3 Once you've removed the wax backing from the adhesive, press the sensor firmly against the surface for 30 seconds.

---

**Do Not:** Place the sensor in a garage, near a fireplace, heating vent or any fuel-burning device or appliance.
