

GETTING STARTED

Garage Door Sensor

The Garage Door Sensor detects when the angle of your garage door tilts. Follow the instructions below for easy setup:

- 1 Make sure the garage door is closed and the surface is clean and dry.
- 2 Position the sensor on the top of the inside of your garage door with the arrow on the sensor pointing up.
- 3 Once you've removed the wax backing from the adhesive, press the sensor firmly against the door for 30 seconds.
